

WeddingAlbum HD

Ingredients: WeddingAlbum, WeddingAlbumOpen, WhiteSatinMagic, picture of your bride and groom

1. Drag and drop WeddingAlbum into slide 1.

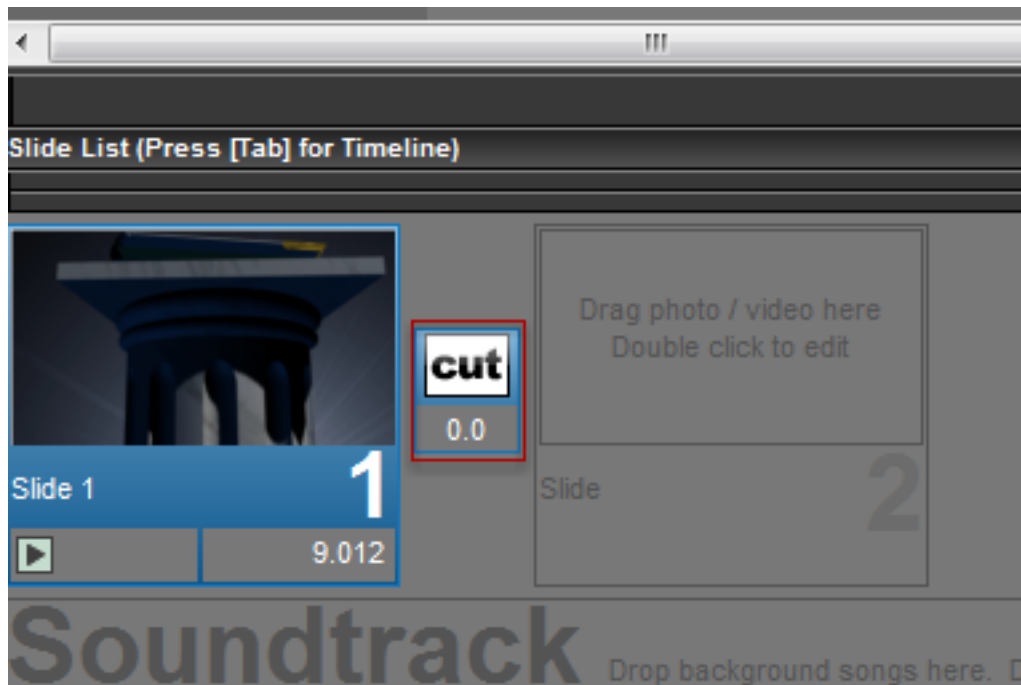

2. Adjust slide time to match video.

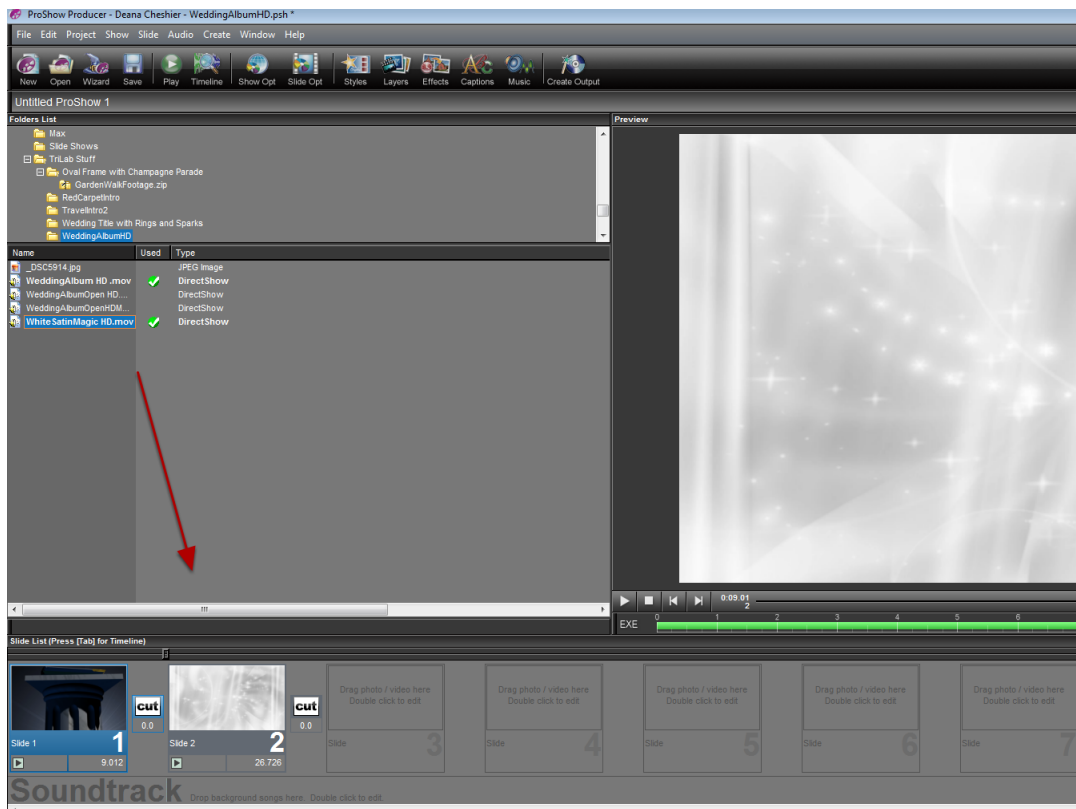

Double click to open **Slide Options**. Under **Layers>Video Settings**, check the box **Lock Slide Time to Video Length**.

3. Set transition to cut.

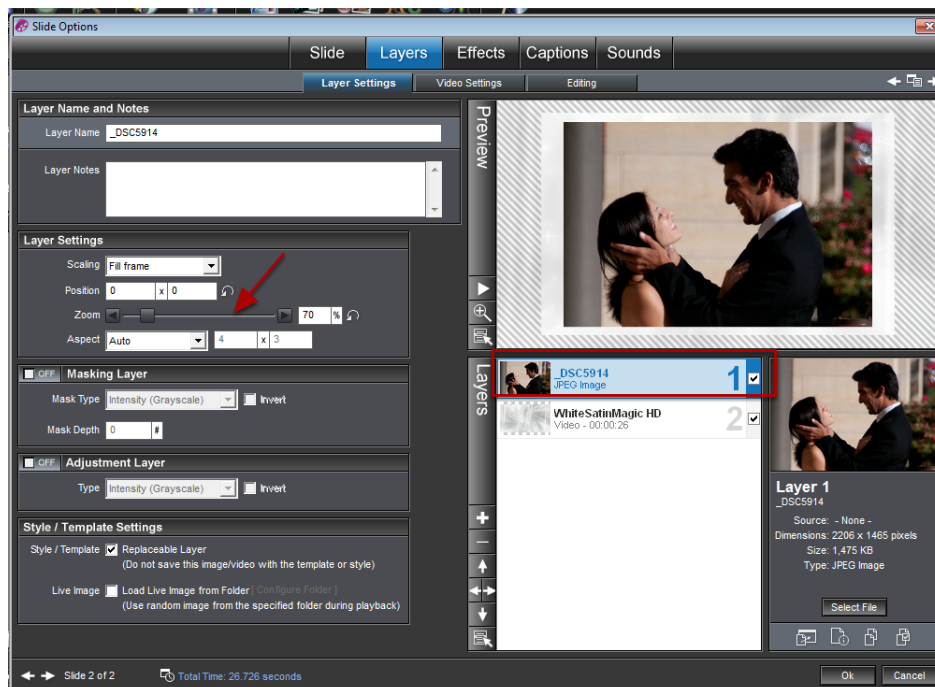

4. Drag and drop WhiteSatinMagic into slide 2.

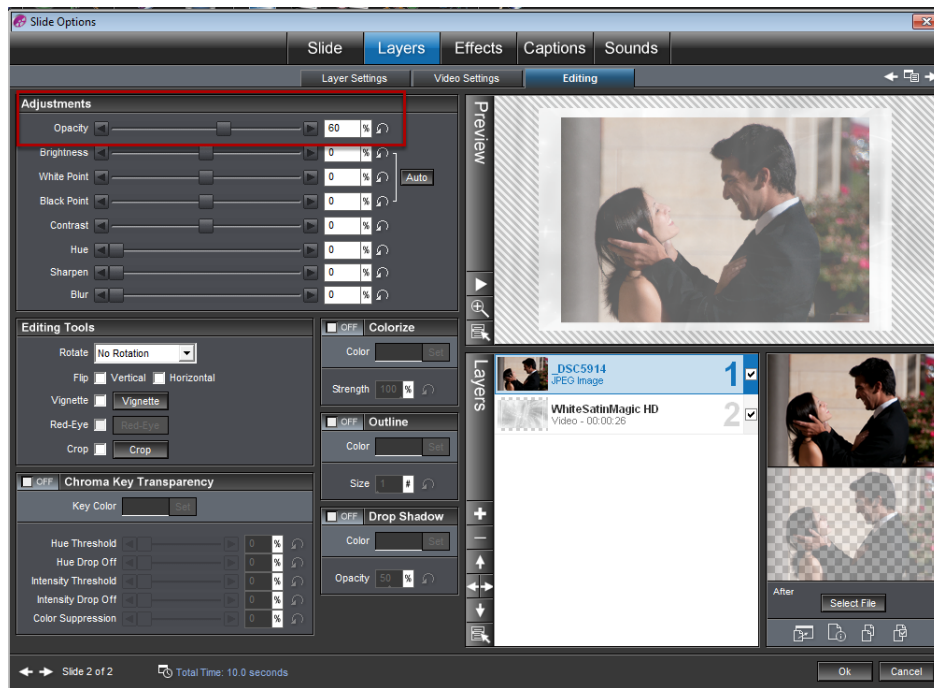

Set **Slide time** to 10 seconds. Double click to open **Slide Options**.

5. Add the photo of the bride and groom. Resize if needed.

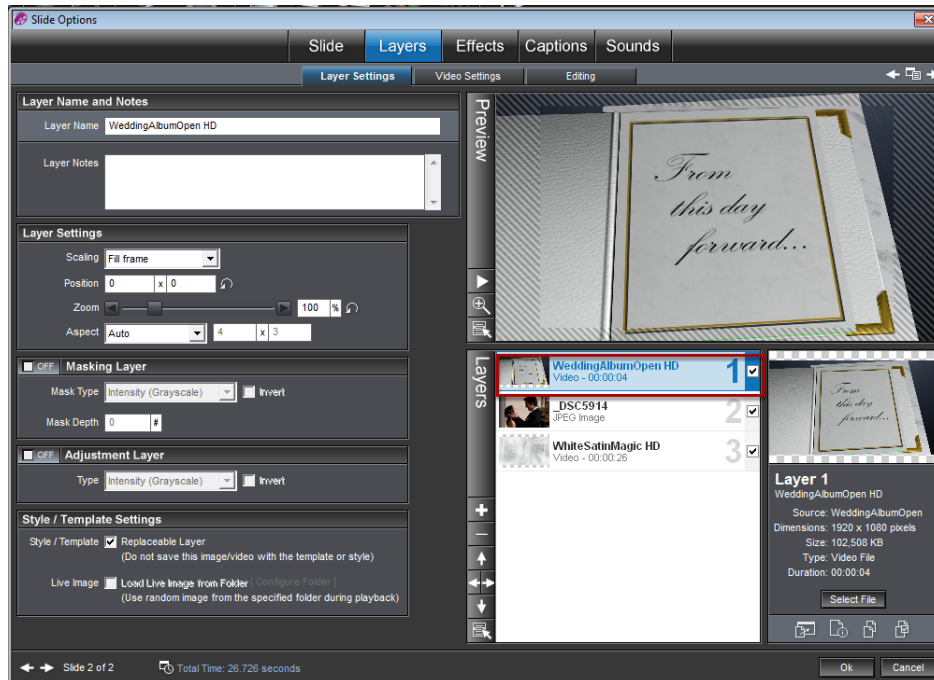

Under **Layers>Layer Settings**, use **+Add Image or Video**. Use **Zoom** control under **Layer Settings** to resize the picture so it doesn't fill the entire frame.

6. Reduce opacity of photo.

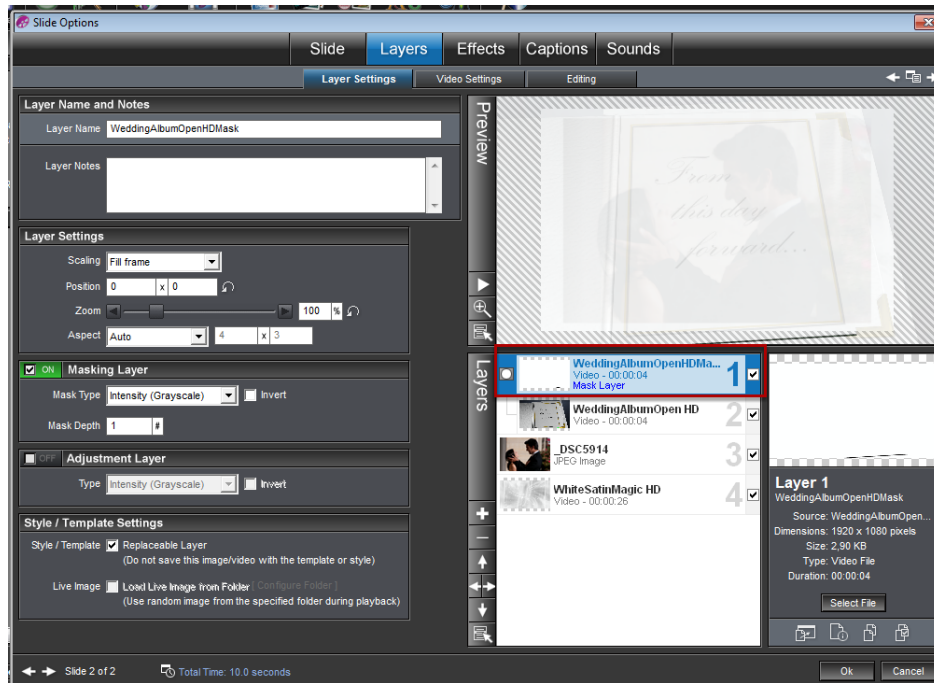

Under **Layers>Editing**, reduce the **Opacity** of the photo to about 60%. This will allow the WhiteSatinMagic animation to show through.

7. Add WeddingAlbumOpen.

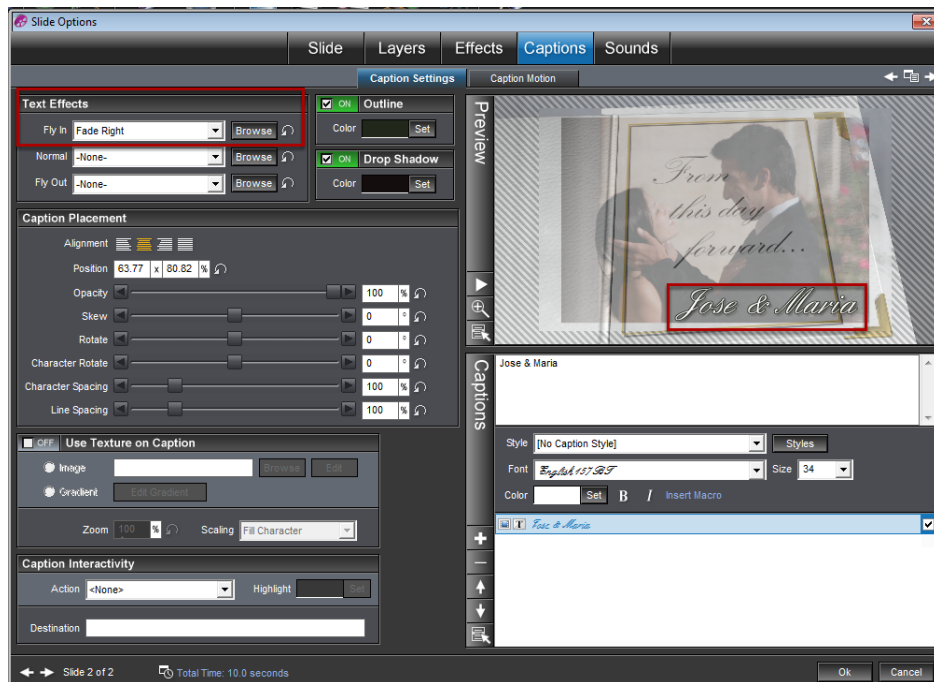

Under **Layers>Layer Settings**, use **+Add Image or Video**.

8. Add WeddingAlbumOpenMask.

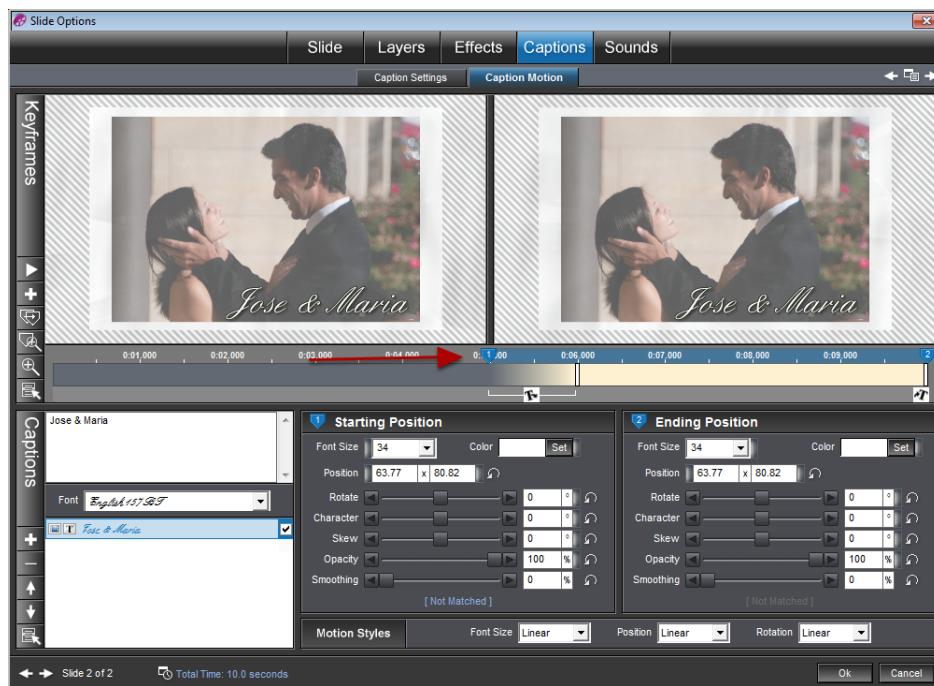

Under **Layers>Layer Settings**, use **+Add Masking Layer>Add Image or Video**.

9. Add a caption.

Under **Captions>Caption Settings**, type your title. Place it toward the bottom right of the bride and groom photo by dragging and dropping it with your mouse. Under **Text Effects>Fly In**, select **Fade Right**.

10. Adjust the caption motion.

Under **Captions>Caption Motion**, drag **Key Frame 1** to 5 seconds. Click OK to exit slide.

End result will be the album opening to your bride and groom softly muted by the satin background.
