

Using Digital Hotcakes Transitions in Adobe Premiere Pro

1. Import your video or photos

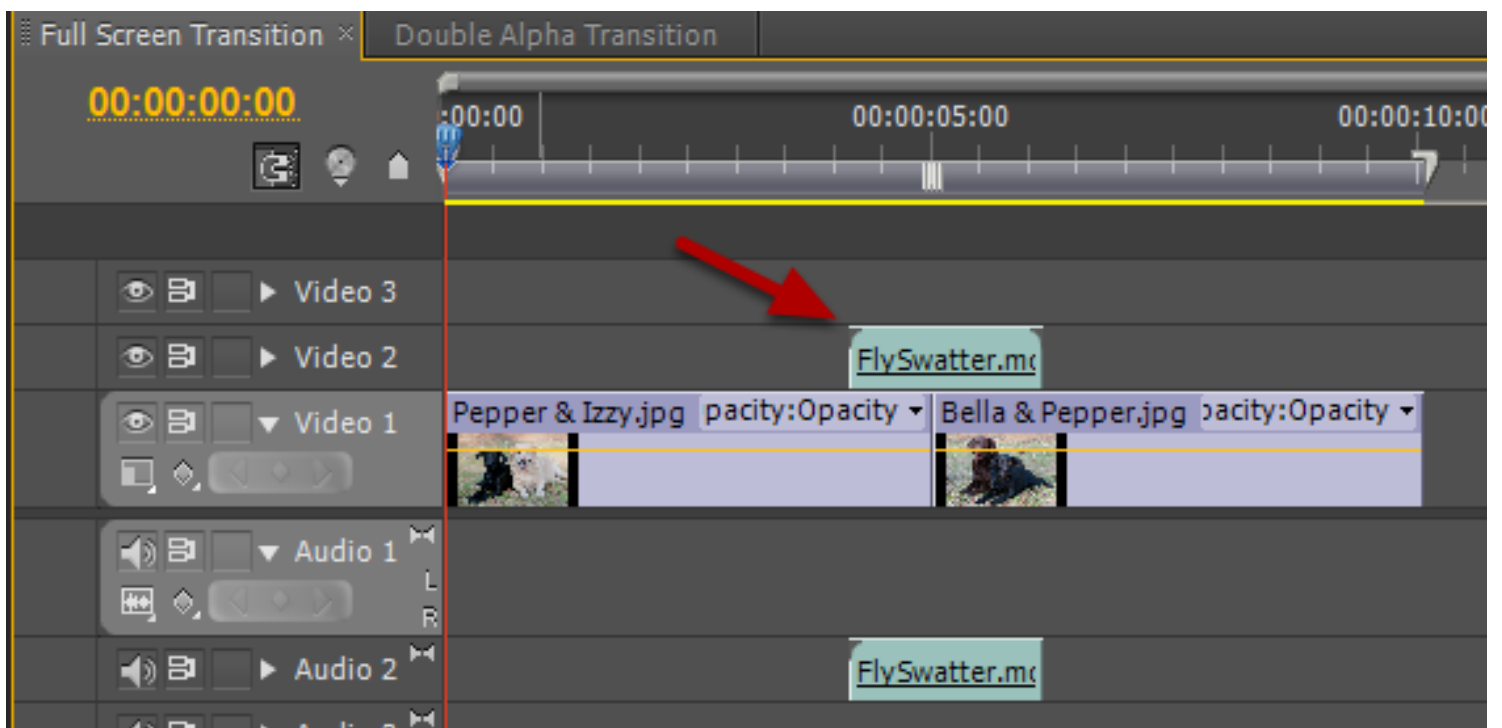

2. Import transition from Digital Hotcakes 101 Transitions

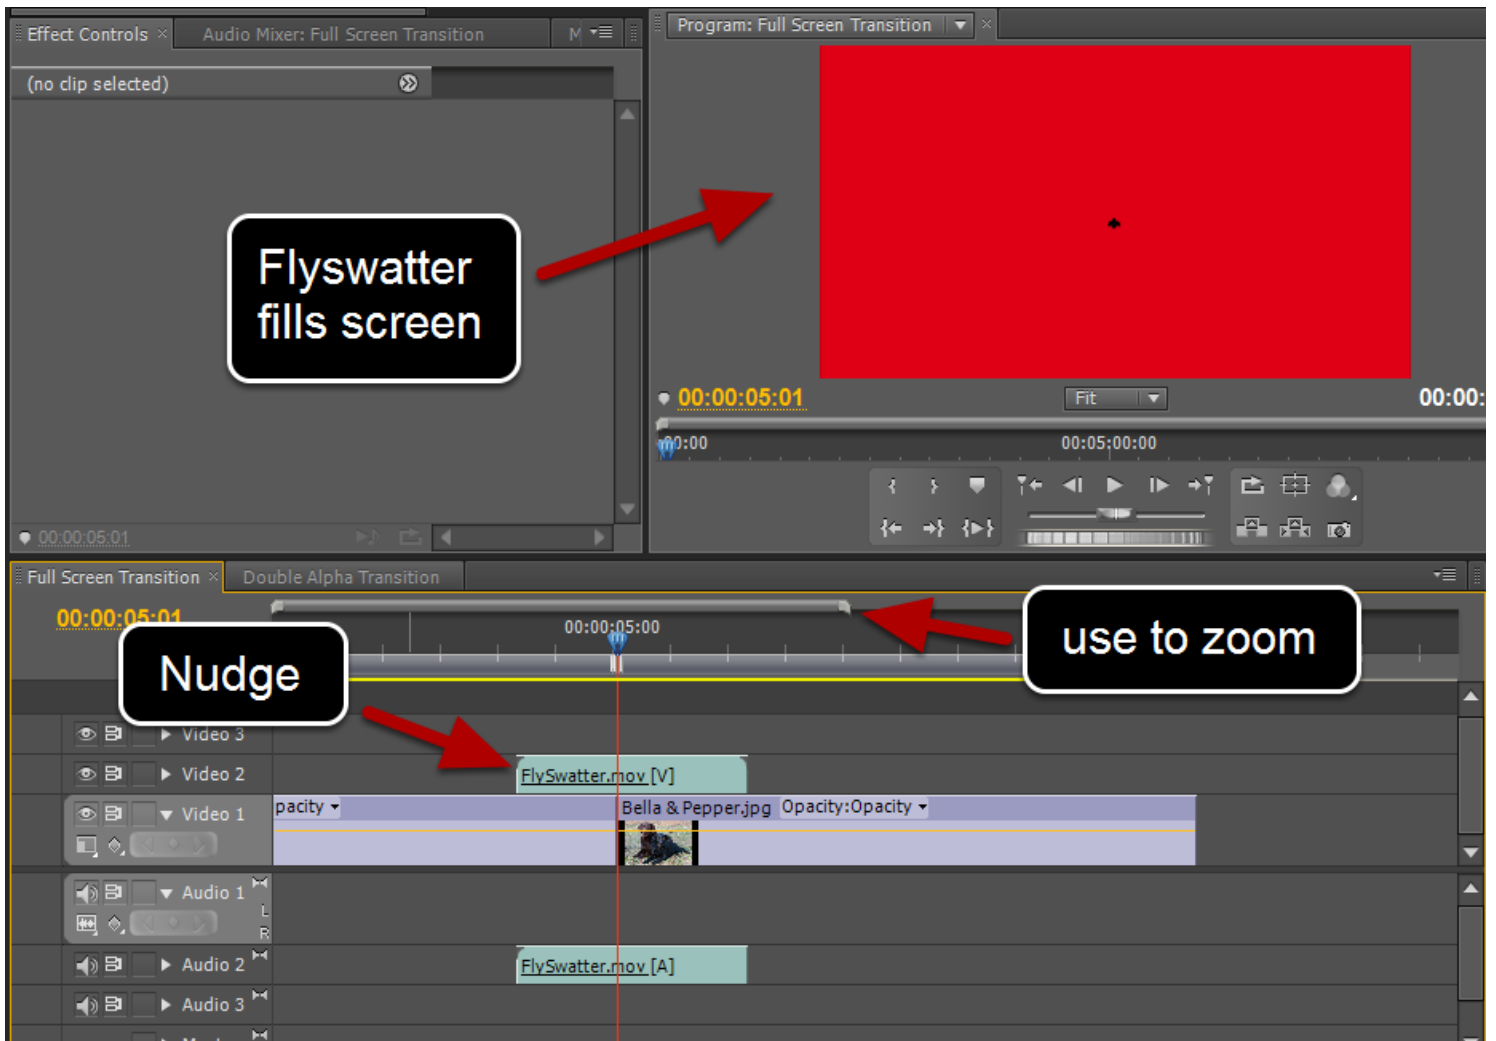

3. Put your videos or photos on Video track 1

4. Put transition clip on Video track 2

5. Nudge the transition clip left or right to cover your cut

Position the transition so that when it fills the screen, it is covering your cut. Zoom in will help you have more precision when nudging.
