

How to use the free lower third matte in Adobe Premiere. You can also use the free TiltedOval matte in the same way.

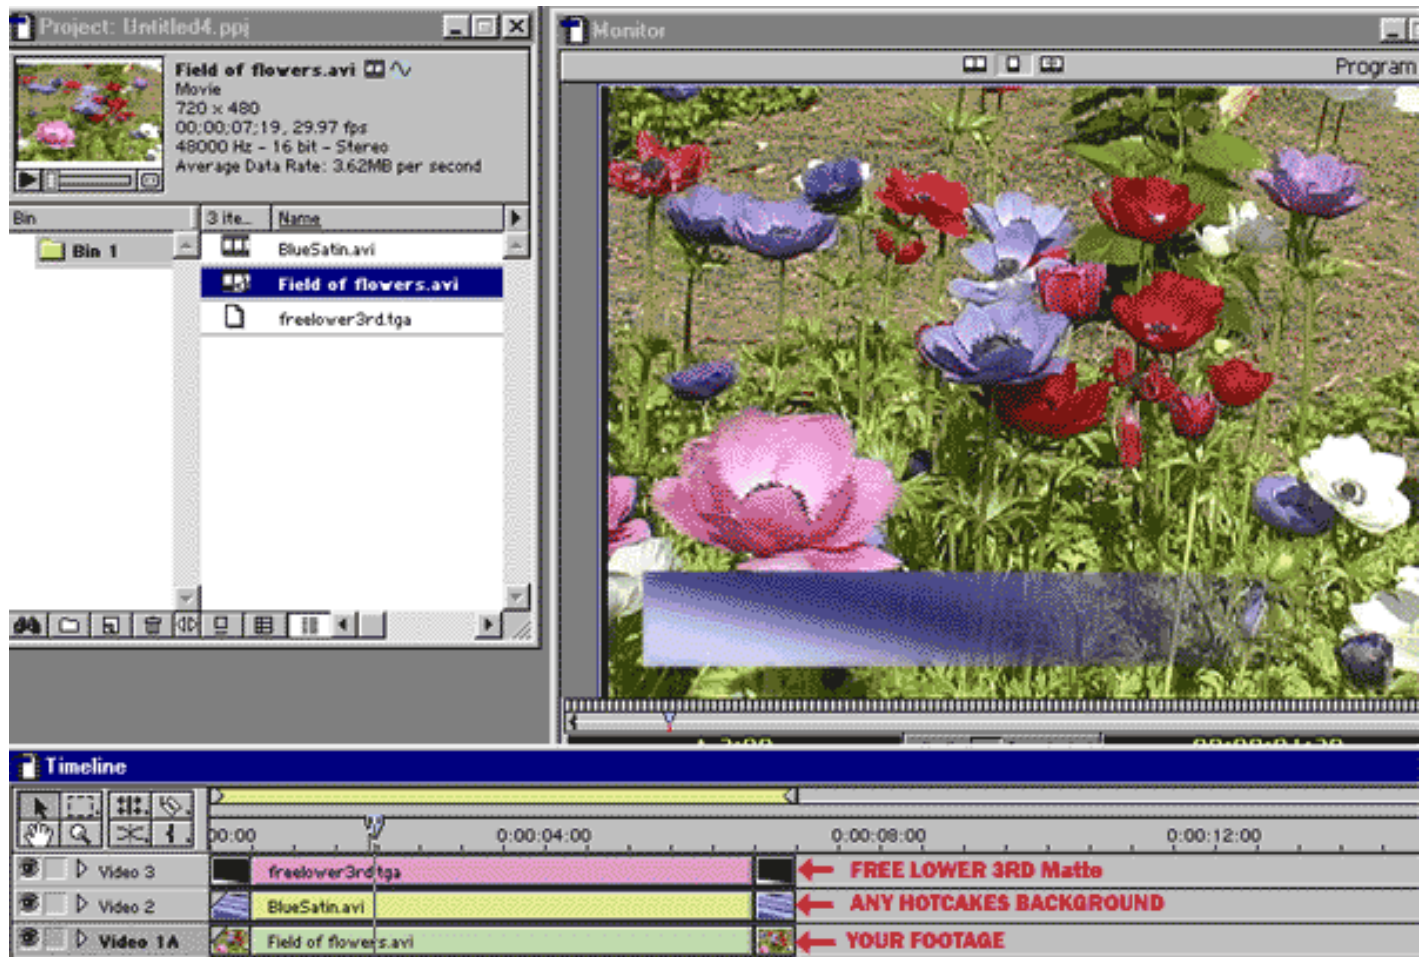

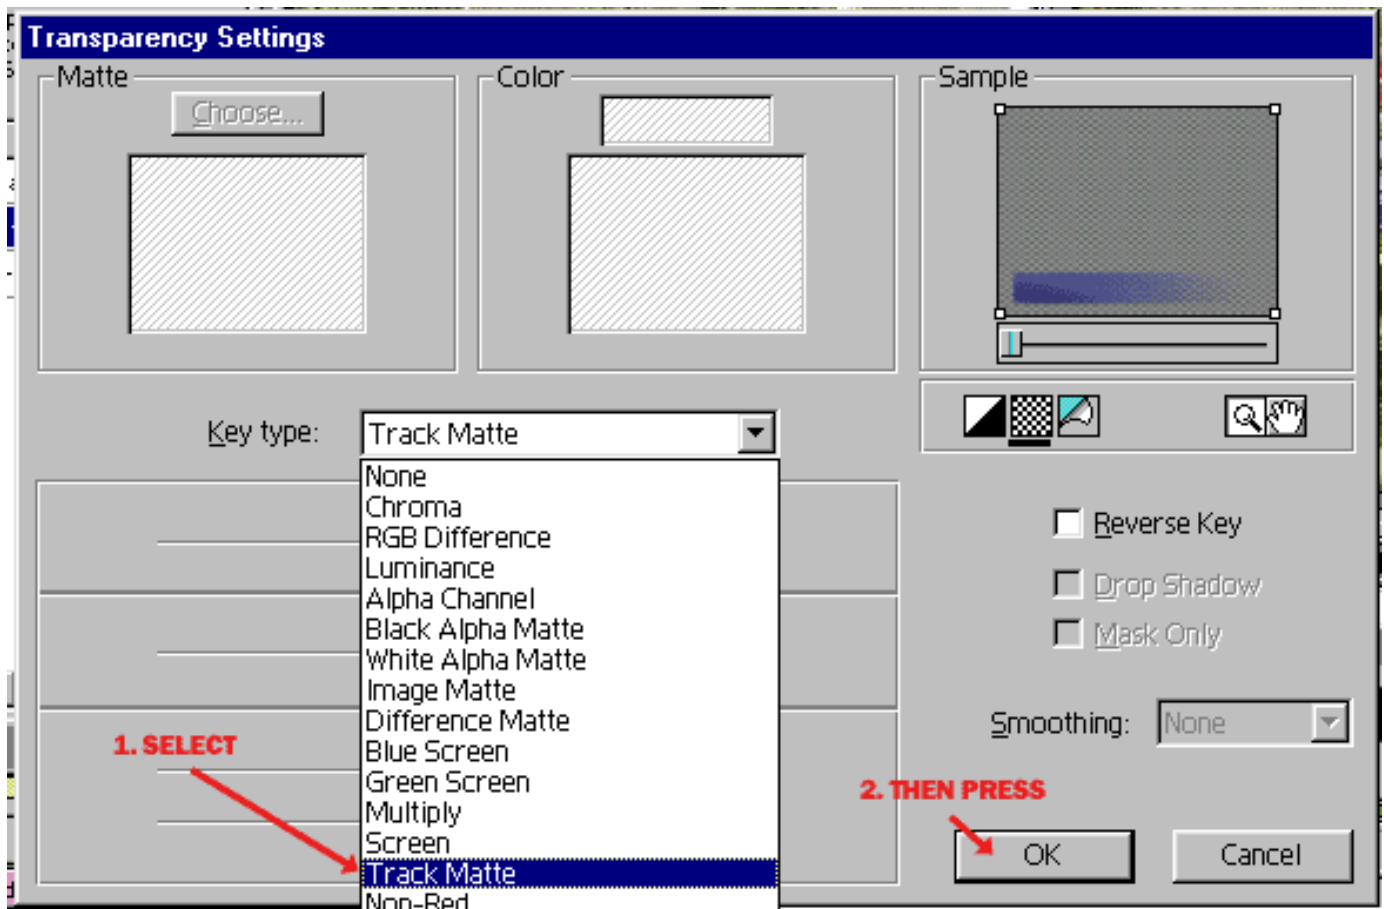

1. Start Premiere, and import your footage, any Digital Hotcakes background, and the FreeLowerThird matte. Place your footage on Video 1, the Digital Hotcakes background movie on Video 2 and the FreeLowerThird matte on Video 3.

2. Right mouse click on Digital Hotcakes background movie in Video Track 2 to bring up the menu found below. Select Video Options>Transparency

3. Select Track Matte from the pull-down list of key types. Then press okay.

4. Render.
